

# H2O MOISTURE ABSORBING PACKETS

- Protects Electrical Systems From Corrosion
- Attracts Water Vapour Like a Sponge
- Absorbs 1000x More Moisture Than Silica Gel
- Vastly Out Performs Standard Desiccants

H2O Moisture Control Packets are desiccating bags developed to combat moisture caused damage that occurs in enclosed areas. The unique design of the packets captures water on a microscopic level, preventing corrosion. Once activated the packet will become Swollen indicating replacement is required.

**Used by:** Vale INCO, Xstrata Nickel, BC Hydro, Maclean Engineering, Brookfield Power, Hudson Bay Mining, Tesco Corporation, Exelon Corporation
